SUMMARY

Final-year Computer Science undergraduate with hands-on experience in full-stack and backend development using the MERN stack. Comfortable building APIs, authentication systems, and database-driven applications. Actively exploring DevOps, cloud infrastructure, and AI integrations. Strong problem-solving mindset with the ability to learn quickly and contribute effectively in team environments.

PROJECTS

BNB | *MongoDB, Express.js, React.js, Node.js, Tailwind CSS*

- Built a full-stack Airbnb-style platform with secure JWT-based authentication and protected routes.
- Implemented listing management with CRUD operations and image uploads using Multer and Cloudinary.
- Designed a booking system with date validation, total price calculation, and booking cancellation flow.
- Added search and filtering by city, landmark, and title with responsive UI.
- Deployed frontend and backend on Render with MongoDB Atlas and production-ready configuration.

Authentication | *MongoDB, Express.js, React.js, Node.js, JWT, MailTrap*

- Developed a secure authentication system with signup, login, logout, email verification, and password reset.
- Implemented JWT authentication using HTTP-only cookies with middleware-based route protection.
- Focused on session handling, validation, and production-ready security practices.

AI Content Writer | *React.js, Node.js, Express.js, TypeScript, OpenAI, GetStream, Tavily*

- Developed an AI content writing assistant to generate LinkedIn posts, blogs, and structured professional content.
- Streamed responses from OpenAI in real time and pushed partial updates to the UI using WebSockets.
- Used GetStream for chat messaging, channel handling, and reliable event synchronization.
- Enabled the AI to fetch current information by integrating Tavily web search during conversations.
- Managed conversation context, request lifecycle, and error handling with a modular TypeScript backend.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C/C++, Python

Frontend: React.js, React Router, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets, Socket.io

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps (learning): AWS (basics), Docker, Kubernetes (basics), Jenkins, Ansible, Nginx

Tools: Git, GitHub, Linux, Postman, MongoDB Atlas, Cloudinary, Grafana

Core CS: OOP, DBMS, Operating Systems, Computer Networks, System Design fundamentals

EDUCATION

MIT Art, Design and Technology University

Bachelor of Technology in Computer Science

Pune, India

2022 – 2026

CERTIFICATIONS

IBM Introduction to Machine Learning – Gained hands-on experience in supervised and unsupervised learning.

DevOps Culture and Mindset – Learned DevOps principles, collaboration, and continuous improvement practices.

EXTRA-CURRICULAR ACTIVITIES

Regular participant in Smart India Hackathon (SIH) with hands-on team-based problem solving experience.

Worked in college academic-project teams, contributing to collaborative development and feature implementation.

Attended work culture practice sessions focused on teamwork, communication, and professional discipline.
